If you disagree with this license even only for a point, you are required to not download the .pdf file of the almanac. If you instead perfectly agree with this license, we wish you a good enjoyment of our work and long days rich in happiness!

THE EARTH CALENDAR

is a highly innovative kind of calendar, whose special features give more meaning, energy and power to everyday life.

There are five essential points in this calendar:

- the reckoning of the years starts again from zero, from the year in which two great cultural and scientific achievements, all mankind's inheritance, were reached: the birth of the Internet and the first walk on the Moon, to indicate a single turning point in the history of our Planet;

- the days of the week are dedicated to the nurturing of positive qualities of the human soul, whose development results in indisputable benefits both to the individual and the community;

- the dates of the astronomical events, the Equinoxes and the Solstices, that indicate the passing of seasons and therefore unite the whole world, are deservedly celebrated;

- the names of days of the week and of months of the year are changed in order to give them a greater emotional, rational, and universalizing power;

- from the subdivision of time in weeks, the social concept of septennia is born: regularly repeated periods of seven years, each having the same behavioral value of the corresponding day of the week, in order to give a functional rhythm to the fundamental activities of human beings not only in the short but also in the long run.

May every day of this year, and of future years, mark a positive step forward to a harmonious development for each of us and an auspicious evolution for all humankind!
